## ABOUT THE COURSE

The Open Invite Live Agent Training (LAT) Course for Market Leaders aims to provide fundamental practical experience in basic work actions of CBRN equipment with live chemical warfare agents and (closed) radioactive sources.

This LAT Environment Course for Market Leaders is designed for CBRN Equipment producers representatives who wish to experience by themselves how their particular CBRN equipment works in basic detection, decontamination and protection exercises with live C/R agents.

## COURSE OBJECTIVES

The objectives of this LAT Environment Course for Market Leaders are to introduce participants to the basic challenges of using their CBRN equipment in “contact” with live C/R agents, to equip them with the necessary basic/advanced practical knowledge/understanding of the behaviour of C/R agents, basics of detection, protection and decontamination and how to better present their products based on experience in Live Agent Training/Testing/Demos.

Additionally, participants will also have the opportunity to gain further understanding from observing entry-level to experienced CBRNE operators/instructors using their equipment and providing unique opportunity to create unique marketing usable recording of their equipment/products.

## TARGET AUDIENCE

Equipment producers who are interested in sending their sales/marketing/other representatives to have a guided walk through in PPE and observe the course and see how their products perform inside the hot zone in a toxic environment. They will also have the unique chance to use their own equipment in a live agent environment.

CBRN Equipment producers representatives, such as R&D, sales, marketing or other professionals of particular companies producing/testing particular CBRN equipment, but without previous live agent (training/testing/demo) experience. This group, mostly coming with some/significant understanding of CBRN/HAZMAT equipment and operations (especially in area of equipment offered by the company they work for) but with no personal live agent experience as how their device works with live C/R agent would undergo this training as a “better knowing your and competition device and use the device yourself” event as well as opportunity to create unique demo

videos/shots of the detection/protection/decontamination device in operation.

## PROFILE OF AUDIENCE

- Sales/marketing/other representatives from companies that manufacture or supply CBRN-related equipment
- Product managers/developers who want to gain a better understanding of how their products are used in the field
- Senior executives who want to gain an appreciation of the risks and challenges faced by CBRN professionals in the field.

## PREREQUISITES

It's important to ensure that all participants meet the necessary prerequisites for the training, such as having completed the CBRN General Awareness course, having medical clearance to work in Personal Protective Equipment, and having a letter of recommendation/reference from their designated/verified/validated employer (as the basis for security clearance for attending the course). More details:

- Basic knowledge of CBRN concepts and principles
- Familiarity with relevant national and international CBRN guidelines and regulations
- Medical clearance to work in PPE
- A letter of recommendation/reference from their employer or supervisor endorsing their participation in the LAT course (and above requirements).

## CERTIFICATE

Upon the successful completion of the Chemical & Radiological Live Agents Training “For Market Leaders”, the participants will gain a (VIP) bronze Medal of Hotzone Solutions Live Agent Training as well a certificate of Completion, this certificate will attest to the skills and knowledge you have acquired by attending this course and will serve as a valuable addition to your professional profile and demonstrate your commitment to professional development.

## COURSE PRICE

Course Public Price: **3999 Euro**  
 ★ Early Bird Price: **3499 Euro**

## COURSE VENUE

Vyškov Military Research Center VVU  
 Vyškov, Czech Republic

## IMPORTANT TIMELINES

**Stay ahead in the CBRN market** by witnessing your products perform in real-life scenarios. This is your moment to take the lead – sign up now and embrace innovation!
